

The varieties were analyzed at the California Wheat Commission wheat quality lab for grain, milling, and bread baking qualities.

Quality score data was statistically analyzed by University of California, Davis Breeding and Small Grains Programs.

Varieties must have a minimum of 2 years' data to be published in the ranking list. As more varieties are introduced and analyzed the ranking is subjected to change on a yearly basis. For specific information on agronomics, consult the wheat certified seed guide: <http://californiawheat.org/resources/> and <http://smallgrains.ucanr.edu/Variety/>.

# CALIFORNIA PREFERRED WHEAT VARIETIES

*Based on baking quality*

**University of California**  
Agriculture and Natural Resources

## 2019 Quality Rakings

Varieties are statistically ranked by bread baking qualities. The varieties are categorized by Recommended, Acceptable and Not Recommended.

Selecting varieties from the preferred class will help to increase the overall quality and desirability of California wheat.

The varieties were planted and harvested from 19 locations across 3 years in California by the University of California.

**Recommended (R)** – Varieties have high test weight, high protein, excellent milling, and excellent end-use bread baking qualities.

**Acceptable (A)** – Varieties have acceptable test weight, protein, milling, and end-use bread baking qualities.

**Not Recommended (NR)** – Varieties have unacceptable test weight, protein, milling and end-use bread baking qualities.

## RECOMMENDED
